# EUROCALCO

Eurocalco is a carbonless paper, manufactured with the innovative Non-Contact technology. It is ideal for all types of forms, delivery notes, invoices and other documents requiring multiple copies.

## EUROCALCO FORMS: TYPES OF SHEETS

There are three types of sheets, which make it possible to create a wide range of forms:

### CB (Coated Back)

Paper with an underside coating containing colourproducing microcapsules. It is used as the original or top sheet of the form.

### CFB (Coated Front and Back)

Paper coated on both sides, with activated clay on the front and microcapsules on the back. It is used as the middle sheet when more than two copies are required.

### CF (Coated Front)

Paper coated on the front with a layer of activated clay. Used as the bottom sheet of the form.
